

Public Allegation Portal — Full English Project Manual

This document provides a complete English summary of your 'Public Allegation Portal' project.

It is designed as a knowledge and training manual for your AI support chatbot.

It includes project structure, UI and component behavior, API endpoints, validation logic, UX flows, and example Q&A for chatbot training.

Project Files Summary

A summarized list of key project files and directories:

Lab Project/

Lab Project/backend/

Lab Project/backend/node_modules/

Lab Project/backend/node_modules/.bin/

Lab Project/backend/node_modules/.bin/mkdirp

Lab Project/backend/node_modules/.bin/mkdirp.cmd

Lab Project/backend/node_modules/.bin/mkdirp.ps1

Lab Project/backend/node_modules/.bin/node-gyp-build

Lab Project/backend/node_modules/.bin/node-gyp-build-optional

Lab Project/backend/node_modules/.bin/node-gyp-build-optional.cmd

Lab Project/backend/node_modules/.bin/node-gyp-build-optional.ps1

Lab Project/backend/node_modules/.bin/node-gyp-build-test

Lab Project/backend/node_modules/.bin/node-gyp-build-test.cmd

Lab Project/backend/node_modules/.bin/node-gyp-build-test.ps1

Lab Project/backend/node_modules/.bin/node-gyp-build.cmd

Lab Project/backend/node_modules/.bin/node-gyp-build.ps1

Lab Project/backend/node_modules/.bin/nodemon

Lab Project/backend/node_modules/.bin/nodemon.cmd

Lab Project/backend/node_modules/.bin/nodemon.ps1

Lab Project/backend/node_modules/.bin/nodetouch

Lab Project/backend/node_modules/.bin/nodetouch.cmd

Lab Project/backend/node_modules/.bin/nodetouch.ps1

Lab Project/backend/node_modules/.bin/semver

Lab Project/backend/node_modules/.bin/semver.cmd

Main Pages and Components

1. Landing Page (Landing_page.jsx)

- Contains top navigation bar, search box (debounced), and Login/Register or Dashboard links depending on authentication state.
- The search box calls ``/api/public/organizations/search`` with debounce, shows suggestions, and navigates to ``/organization/{slug}`` when selected.
- Hero section contains a “Report an Allegation” button linking to the anonymous complaint page, and highlight cards explaining features.
- Theme: Green and White, styled using Tailwind CSS.

2. Anonymous Complaint Page (Anonymous.jsx)

- Form for submitting anonymous complaints: title, organization dropdown, optional department, description, priority, and attachment (max 10MB).
- Allowed file types: .jpg, .png, .pdf, .mp4, .mp3
- Submission: ``POST /api/complaints`` (FormData) with ``isAnonymous=true``, and displays tracking code if provided.
- Includes the same top navigation bar with fully functional search as on the Landing Page.

3. Organization Page (Organization_page.jsx)

- Handles both public and private organizations. Private ones prompt the user to log in.
- Tabs: Complaints, Departments (admin only), Members (admin only).
- Complaints tab: search, filter by status, pagination, upvote system, and detailed view panel.
- Detail panel allows admins to update complaint status, view attachments, delete, or manage votes.
- Admin workflows: add/delete departments, manage members (ban), view statistics.

API Endpoints Summary

Key API endpoints used in the project:

- GET `/api/public/organizations/search?q=...` → Search public

organizations (for typeahead)

- GET /api/organizations → List organizations
(for anonymous complaint page)
- GET /api/departments?organizationId=... → List departments of an organization
- POST /api/complaints → Submit complaint
(FormData), includes isAnonymous=true if anonymous
- GET /api/organizations/{slug}/complaints → View organization complaints (public/private)
- POST /api/complaints/{id}/vote → Upvote a complaint
- PATCH /api/complaints/{id} → Update complaint status
(admin-only)
- DELETE /api/complaints/{id} → Delete complaint
(admin-only)
- POST /api/organizations/{slug}/departments → Create new department
(admin-only)
- DELETE /api/organizations/{slug}/departments/{id} → Delete a department
(admin-only)
- GET /api/organizations/{slug}/members → List members (admin-only)
- POST /api/organizations/{slug}/members/{id}/ban → Ban a member (admin-only)

Tip: Always include Authorization: Bearer <token> for private/admin routes.

Form Validation and Limits

- Allegation Title: Minimum 6 characters (required)
- Description: Minimum 15 characters (required)
- Organization: Must be selected (required)
- Department: Optional (defaults to NONE_DEPT meaning entire organization)
- Priority: Low / Medium / High (radio)
- Attachment: Allowed types — .jpg, .png, .pdf, .mp4, .mp3; Max size 10MB
- Duplicate submissions prevented via 'submitting' flag.

UX Behavior and Flows

- Search: Debounced (250ms) search with AbortController to cancel previous requests.
- Selecting a suggestion navigates to /organization/{slug}. If no exact match, navigates to the typed query as a slug.

- Private orgs (403) display "This organization is private. Please log in." with Login/Register buttons.
- Anonymous submission: Shows success message and tracking code after successful POST.

Chatbot Training Intents (English)

Here are example intents and responses for training your support chatbot:

1. Organization search intent

User examples:

- "Where is Dhaka Water Board?"
- "Search for Rangpur municipality"
- "Find organization: health department"

Bot response:

- "You can search for an organization by name or slug. For example: 'rangpur-municipality' or 'Health Board'. Please type what you want to search for."

2. Anonymous complaint submission

User:

- "How do I file an anonymous complaint?"
- "I want to report without revealing my name."

Bot:

- "Click the 'Report an Allegation' button, fill out the form (minimum 6 characters for title, 15 for description, choose organization, optional attachment). Max file size: 10MB. You will receive a tracking code after submission."

3. File upload rules

User:

- "Can I upload a PDF?"
- "What is the maximum file size?"

Bot:

- "Yes, supported formats are .pdf, .jpg, .png, .mp4, .mp3. Maximum size is 10MB."

4. Private organization access

User:

- "Why can't I view complaints for some organizations?"

Bot:

- "Those organizations are private. You must log in and be added as a member by

the organization admin to view complaints."

5. Tracking code lookup

User:

- "How can I check my complaint status using my tracking code?"

Bot:

- "Please provide your tracking code. I will check its current status via the backend endpoint `/api/complaints/{trackingCode}`."

6. Admin tasks

User:

- "How can I create a new department?"

Bot:

- "Go to Admin Panel → Departments → Create Department. Provide a name and submit. (API: POST `/api/organizations/{slug}/departments`)"

Deployment and Environment Tips

- Frontend: React + Tailwind CSS; ``/api`` proxy configured for local dev. In production, adjust backend URL.
- Authentication: JWT stored in localStorage under 'token'. Add Authorization headers for private endpoints.
- Recommended: Enable CORS, rate limiting, and file antivirus scanning for attachments.
- Database: Should include tables for complaints, users, departments, memberships, tracking codes.
